1. Introduction

Alien Taxi is a community-driven crypto ecosystem built around gaming, competition, transparency and long-term participation.

The project combines a fixed-supply token, a public reward framework and a playable **Alien Taxi** game where community members compete through seasons and milestones.

This document explains the **Alien Taxi** token structure, Play-to-Win reward model, wallet separation, Creator Rewards allocation, holder participation model, community incentives and risk boundaries in a clear public format.

2. Story of Alien Taxi

A green alien arrived on Earth with one mission: to return to the Moon.

To survive, he became a taxi driver.

Players join him on this journey through gaming, competition and community engagement. Every ride is part of the same mission: build the community, complete the route and keep driving toward the Moon.

3. Vision

Alien Taxi aims to become a recognizable community ecosystem where token culture, casual gaming and transparent reward mechanics support each other.

The project is designed around four principles:

- Simple and readable tokenomics.
- Seasonal Play-to-Win rewards separated from community incentives.
- Free Daily gameplay for discovery and holder-gated reward competition for community alignment.
- Public wallet transparency.
- Long-term sustainability supported by future Creator Rewards received in SOL.

Alien Taxi is not designed as a short-lived campaign. It is designed as a brand and ecosystem that can adapt over time.

4. Token Overview

ITEM	VALUE
Token	\$TAXI
Total Supply	1,000,000,000 \$TAXI
Initial Main Reward Pool	250,010,000 \$TAXI
Initial Main Reward Pool Share	Approximately 25% of total supply
Distribution Asset	\$TAXI
Tax	0%

All Play-to-Win distributions are made in **\$TAXI** tokens.

USD values represent the equivalent value of **\$TAXI** at payout time.

Creator Rewards are received in SOL. They do not increase the fixed **\$TAXI** supply and do not represent a new token allocation.

No automatic reward inflation exists.

5. Official Wallet Structure

Alien Taxi uses two separate public wallets for reward transparency.

Main Reward Pool Wallet

Alien Taxi Reward Pool Wallet:

[<https://solscan.io/account/2bdfqoXmLssSkRoFNB54zGveuFbpP995FQr8vahYKVaV>]
(<https://solscan.io/account/2bdfqoXmLssSkRoFNB54zGveuFbpP995FQr8vahYKVaV>)

This public wallet is dedicated exclusively to **Alien Taxi** Play-to-Win rewards and allows the community to verify reward reserves transparently on-chain.

Community Treasury Wallet

Alien Taxi Community Treasury Wallet:

[<https://solscan.io/account/9dP5uSUksuyzSEZ2EjYgBLSLUa3NoWjoncjVYsia977K>]
(<https://solscan.io/account/9dP5uSUksuyzSEZ2EjYgBLSLUa3NoWjoncjVYsia977K>)

This public wallet funds the Weekly Top 10 Reward Pool and may also support community initiatives, giveaways and ecosystem growth activities.

The Community Treasury Wallet may initially contain no funds. It is designed to be progressively funded through future Creator Rewards according to the **Alien Taxi** tokenomics structure.

Seasonal rewards and weekly/community rewards remain separated. The Main Reward Pool is not used for weekly Creator Rewards distributions, giveaways, social campaigns or community competitions.

6. Main Reward Pool

The Main Reward Pool starts with 250,010,000 **\$TAXI**, approximately 25% of the total supply.

The Main Reward Pool is designed for:

- Seasonal Play-to-Win rewards.
- Winner rewards.
- Long-term reward sustainability.
- Future Play-to-Win seasons, subject to available reserves and project decisions.

The Main Reward Pool must remain distinct from the Community Treasury.

Community rewards are not funded from the Main Reward Pool.

7. Community Treasury

The Community Treasury is a separate wallet used for the Weekly Top 10 Reward Pool and community engagement initiatives.

The Community Treasury may support:

- Weekly Top 10 leaderboard rewards.
- Community competitions and special challenges.
- Giveaways.
- Social campaigns.
- **Alien Taxi** events.
- Ecosystem participation rewards.

The Weekly Top 10 competition is a core **Alien Taxi** game loop. Weekly reward amounts are variable because they are based on actual Creator Rewards received in SOL during the relevant week.

Weekly and community rewards never reduce the Main Reward Pool reserved for Play-to-Win seasonal rewards.

8. Creator Rewards in SOL

Future Creator Rewards are received in SOL.

Alien Taxi intends to allocate future Creator Rewards as follows:

CREATOR REWARDS RECEIVED IN SOL	INTENDED ALLOCATION
30%	Purchase \$TAXI and strengthen the Main Reward Pool
20%	Fund the Weekly Top 10 Reward Pool through the Community Treasury
50%	Creator Allocation

The 30% Main Reward Pool allocation is intended to purchase **\$TAXI** and replenish the reward reserves over time. Purchases may be executed periodically depending on market conditions, available liquidity and operational timing.

The 20% Community Treasury allocation is intended to fund the Weekly Top 10 Reward Pool without using the Main Reward Pool. Community initiatives may also be supported when resources allow.

The 50% Creator Allocation may support development, operations, strategic reserves, creator compensation and long-term project growth.

This structure is designed to strengthen future seasons, support community engagement and align project growth with player participation.

9. Market Cap Milestones

The **Alien Taxi** Play-to-Win reward structure is tied to market cap milestones. Each season has a market cap trigger before seasonal rewards are unlocked.

SEASON	NAME	MC TRIGGER	WINNERS	REWARD PER WINNER	TOTAL REWARD
Season 1	Launch	\$350,000	10	\$1,000	\$10,000
Season 2	Growth	\$1,000,000	20	\$2,000	\$40,000
Season 3	Expansion	\$2,500,000	25	\$6,400	\$160,000
Season 4	Moon Ascent	\$6,000,000	5	\$100,000	\$500,000

Total Winners: 60

Total Reward Value: \$710,000 USD equivalent distributed in **\$TAXI**.

10. Seasonal Reward Structure

Season 1 - Launch

MC Trigger: \$350,000

10 winners receive \$1,000 USD equivalent each, distributed in **\$TAXI**.

Season 1 total reward value: \$10,000 USD equivalent.

Season 2 - Growth

MC Trigger: \$1,000,000

20 winners receive \$2,000 USD equivalent each, distributed in **\$TAXI**.

Season 2 total reward value: \$40,000 USD equivalent.

Season 3 - Expansion

MC Trigger: \$2,500,000

25 winners receive \$6,400 USD equivalent each, distributed in **\$TAXI**.

Season 3 total reward value: \$160,000 USD equivalent.

Season 4 - Moon Ascent

MC Trigger: \$6,000,000

5 winners receive \$100,000 USD equivalent each, distributed in **\$TAXI**.

Season 4 total reward value: \$500,000 USD equivalent.

11. Reward Distribution Formula

Reward distributions are calculated using the **\$TAXI** price at payout time.

Formula:

Reward Value in USD Equivalent / **\$TAXI** Price at Payout = Number of **\$TAXI** Distributed

Example:

If a reward is worth \$1,000 USD equivalent and **\$TAXI** is valued at \$0.001 at payout time:

$\$1,000 / \$0.001 = 1,000,000$ **\$TAXI** distributed

This formula keeps the published reward value expressed in USD equivalent while ensuring all distributions are made in **\$TAXI** tokens.

12. Example Scenario Backtest

The published example scenario estimates how much of the Main Reward Pool could be used under the projected seasonal reward framework.

ITEM	VALUE
Initial Main Reward Pool	250.01M \$TAXI
Estimated Seasonal Tokens Used	215.90M \$TAXI
Main Reward Pool Safety Buffer	34.11M \$TAXI
Safety Margin	13.64%

Example scenarios are illustrative and do not constitute guarantees.

Values may vary based on **\$TAXI** price at payout time, market conditions and available resources.

The Main Reward Pool Safety Buffer remains inside the Main Reward Pool. It is not the Community Treasury and is not used for community giveaways or periodic community competitions.

Figures are rounded for public presentation.

13. Sustainability Loop

The Creator Rewards structure creates a sustainability loop.

If winners receive **\$TAXI** and some reward tokens circulate back into the market, **Alien Taxi** intends to use 30% of future Creator Rewards received in SOL to purchase **\$TAXI** and replenish the Main Reward Pool.

This mechanism is designed to:

- Reinforce future Play-to-Win seasons.
- Support long-term reward sustainability.
- Keep weekly/community rewards separated from seasonal rewards.
- Reduce reliance on the initial Main Reward Pool over time.

This mechanism does not guarantee price stability, market demand, liquidity or future rewards.

14. Weekly Competition Reward System

Alien Taxi runs a Weekly Top 10 competition as a core part of the game.

The Weekly Top 10 Reward Pool is funded through the Community Treasury and remains completely separate from the Main Play-to-Win Reward Pool.

Weekly rewards follow this funding rule:

- Each week, 20% of Creator Rewards received in SOL during that week funds the Weekly Top 10 Reward Pool.
- Weekly reward eligibility requires a registered Solana wallet holding **\$TAXI**, verified server-side.
- The weekly pool is distributed by active reward slot after anti-cheat review.
- If a player is disqualified, reward slots cascade fairly according to the cleaned leaderboard order.
- Reward amounts remain variable because Creator Rewards received in SOL can vary from week to week.
- Weekly rewards remain separate from seasonal Play-to-Win rewards.

The intended Weekly Top 10 slot allocation is:

ACTIVE WEEKLY REWARD SLOT	CATEGORY	SHARE OF WEEKLY REWARD POOL
#1	Champion	30%
#2	Elite	17.5%
#3	Elite	12.5%
#4 to #10	Standard	40% shared equally

This means the Weekly Reward Pool equals 20% of Creator Rewards received in SOL for that week, then the active slots split that pool according to the table above.

Community initiatives, giveaways and special events may also be supported through the Community Treasury when resources allow.

15. Holder Participation Model

Alien Taxi separates open gameplay from reward eligibility.

Daily Moon Run is free and username-only. It is designed as an accessible discovery funnel where new players can try the game, appear on a separate Daily leaderboard and share progress without connecting a wallet.

Reward Game participation is different. Season and Weekly reward eligibility requires a registered Solana wallet holding **\$TAXI**. The wallet is locked to the player profile and holder status is verified server-side on Solana before reward runs can count.

This structure is designed to benefit the ecosystem in several ways:

- New players can discover **Alien Taxi** without wallet friction through the free Daily mode.
- Reward competition is focused on participants who hold **\$TAXI** and are therefore more aligned with the community.
- The holder gate supports healthier participation by reducing purely extractive reward farming from players who only enter to capture payouts without joining the ecosystem.
- Weekly rewards remain tied to actual Creator Rewards received in SOL, helping avoid fixed payout promises disconnected from available resources.
- Holding **\$TAXI** becomes part of the participation loop: discover the game, join the community, hold the token, compete for rewards and support long-term engagement.
- Server-side holder verification creates a cleaner rule set because eligibility is checked by the backend instead of relying on manual wallet claims.

The holder participation model does not guarantee price appreciation, liquidity, rewards, profit or market demand. It is an ecosystem design choice intended to align gameplay, community participation and token utility more clearly.

16. Governance and Ecosystem Growth

Alien Taxi is built as a community-driven ecosystem.

Governance mechanisms may evolve over time. Community members may help guide:

- Events.
- Tournaments.
- Challenges.
- Ecosystem initiatives.
- Community Treasury usage.
- Future gameplay features.

Any future governance structure remains subject to ecosystem maturity, available resources, community participation and implementation feasibility.

17. Risk Disclaimer

Nothing in this document constitutes:

- Financial advice.
- Investment advice.
- Guaranteed returns.
- Guaranteed rewards.
- Guaranteed payouts.
- Guaranteed market capitalization.
- Guaranteed ecosystem growth.
- Guaranteed token holder benefits.
- A promise of passive income.
- A promise of APY, ROI, yield or profit.
- A promise of future liquidity, price performance or market demand.

Market conditions may vary.

Example scenarios are illustrative.

Future initiatives depend on available resources, community participation, ecosystem priorities, liquidity and market conditions.

Participants should make independent decisions and understand the risks associated with crypto assets.

18. Transparency Commitments

Alien Taxi is built around public, readable commitments:

- Total supply remains 1,000,000,000 **\$TAXI**.
- Initial Main Reward Pool remains 250,010,000 **\$TAXI**.
- Seasonal Play-to-Win rewards are funded from the Main Reward Pool.
- Weekly Top 10 rewards are funded separately through the Community Treasury.
- Daily Moon Run remains free and separated from Season and Weekly reward rankings.
- Season and Weekly reward eligibility requires a registered Solana wallet holding **\$TAXI**.
- Holder status is verified server-side before Reward Game runs can count for rewards.
- Future Creator Rewards are received in SOL.
- 30% of future Creator Rewards received in SOL are intended to purchase **\$TAXI** and strengthen the Main Reward Pool.
- 20% of future Creator Rewards received in SOL are intended to fund the Weekly Top 10 Reward Pool through the Community Treasury.
- 50% of future Creator Rewards received in SOL remain Creator Allocation.
- All Play-to-Win distributions are made in **\$TAXI** tokens.
- USD values represent the equivalent value of **\$TAXI** at payout time.
- No price stability, profit, yield, ROI or additional fixed rewards are guaranteed.

The project aims to keep its tokenomics, reward framework and ecosystem direction easy to understand.

19. Conclusion

Alien Taxi begins with a simple story: one alien, one taxi and one mission.

The ecosystem connects a fixed-supply token, a public Play-to-Win reward framework, transparent wallets and a playable game into a community-driven experience.

The Main Reward Pool protects seasonal rewards.

The Community Treasury supports the Weekly Top 10 competition and community engagement.

Future Creator Rewards received in SOL may help purchase **\$TAXI** and strengthen long-term reward sustainability.

Daily gameplay keeps the door open to new players.

Holder-gated Reward Game participation keeps the reward system focused on the **\$TAXI** community.

One taxi.

One mission.

One legacy.

To the Moon.

Alien Taxi
